Focused and quick-learning Full Stack Developer with 6 years of experience in Java, JavaScript, NodeJs, OracleJet, SpringBoot, REST APIs and Microservices.

SKILLS

- Java, SpringBoot, JUnit, Mockito, Rest Assured
- JavaScript, NodeJs, Oracle Jet, Mocha
- Microservices, REST APIs, Swagger
- Gradle, Maven, Linux, Kibana, Drools, MySQL

EXPERIENCE

Oracle
Mar 2020 - Present

Senior Member Of Technical Staff

Cisco Systems
Jul 2015 - Mar 2020

Software Development Engineer

PROJECTS

Oracle - Enterprise Manager & Cloud Control (EMCC)

- Developed various key business features in EM, EM is a complete cloud lifecycle management solution enabling customers to quickly set up, manage, and support enterprise clouds and traditional Oracle IT environments from applications to disk.
- Built OOB dashboards and customized dashboards for EM pages using Oracle Jet, NodeJs, JavaScript and TypeScript.
- Experience working with Gradle, Linux, ADE, ADF, RequireJs and KnockoutJS for building various EM pages and dashboards.
- Responsible for writing Restful APIs documented using Swagger and tested with Rest Assured framework.
- Experience working with MySQL.
- Wrote Javascript unit tests using Mocha, Chai, Sinon, Karma, and Jasmine

Cisco Systems - Cisco Commerce Workplace (CCW)

- Maintained and implemented a microservice in java from scratch and integrated with 3rd party api for additional capabilities.
- Externalised the application properties through Consul K-V.
- Implemented Circuit breaker to support fault tolerance from external calls.
- Responsible for writing NodeJs Service to support create quote via upload (XLSX and CSV files) and download report (XLSX and CSV files) capability.
- Implemented RabbitMQ for messaging. Have basic knowledge of Kafka also.

- Collaborated with a large team of developers (80+), Quality Analysts, product owners and scrum masters across multiple time zones to develop features in agile methodology(3 weeks deployment cycle).
- Have been epic planner many times for various scopes to find solution/design and changes in various microservices.
- Responsible for writing Restful APIs in a micro-service based architecture for providing quoting & contract validations capabilities.
- Experience working with Cassandra and Elastic Search.
- Have worked with oauth, Memcached, GraphQL, Grafana, Log4j, JUnit, Mockito.

EDUCATION

MS Ramaiah Institute Of Technology, Bangalore
2011-2015

BE, Computer Science & Engineering, CGPA - 9.26

DPS Ranchi
2009-2011

Intermediate, 91.80%

DAV Bharechnagar
2009

SSC, 93.50%
